

# The San Francisco Tesla Society

Presents a free lecture by

Harold J. Kristal, D.D.S.

“The Effect of Blood pH on  
Metabolic Imbalances”

Sunday, October 15, 2000 1:00 p.m.

at 3220 Sacramento Street (near Lyon)  
San Francisco, California

from The Andromeda Strain

In Michael Crichton's science fiction novel and movie “The Andromeda Strain” a deadly alien virus is released into a small town killing everyone except for a cranky drunkard and a small baby. Puzzled government scientists seeking an effective treatment to stop the virus from spreading, discover the two survivors were still alive because both had an abnormal Acid/Alkaline pH balance in their blood that the virus could not live in.

In real life, your blood pH level has a dramatic effect on your general health and susceptibility to disease. Blood pH is influenced by genetic factors, diet, exercise and the environment. Many common disease microbes do flourish and multiply in one pH level, and die out at another pH level. Under the right circumstances, taking advantage of this fact can also save your life.

HAROLD KRISTAL, D.D.S. is a pioneer in the field of blood pH “Metabolic Typing”. He manages a related website <http://www.bloodpH.com> and is an instructor for metabolic typing seminars. He has written numerous articles on nutrition and the immune system for such publications as the Townsend Letter For Doctors, and Alternative Medicine. He is also a graduate of the Minnesota School of Dentistry (1947), former president of the Contra Costa Dental Association, a fellow in the American Institute of Oral Biology, chairman of the California Holistic Dental Study Club (1983-1989), and maintains a busy private practice in Corte Madera, CA .
