

The San Francisco Tesla Society

Spring 2003 Schedule of Free Lecture Presentations
at 3220 Sacramento Street (near Lyon), San Francisco, California

Sunday, April 13, 2003 1 p.m.

BRUCE LIPTON, Ph.D. in a recorded video presentation "***Biological Consciousness, The Science of Innate Intelligence***". Bruce Lipton takes a breathtaking new look at the hidden underlying energy mechanisms of cellular dynamics. Dr. Lipton makes some interesting analogies as to how cells really work, sometimes introducing concepts from information science. Bruce explains how real time decisions processed at cellular membranes from a variety of information sources, are the primary activities which makes us alive. He describes some of the key intricacies of how electrical as well as chemically based networked information flow, changes cellular dynamics within the body and how cellular information flow can be influenced by the state of your consciousness.. Bruce Lipton explains how the new rapidly evolving science of energy medicine works, a science that can dramatically change our options for cost effective quality non invasive health care in the 21st century.

Sunday, May 11, 2003 1 p.m.

PETER O'DONNELL, JOSEPH NEIL, Ph.D. & others to be announced present "***Power From The Golden Gate - A Bold New Plan To Harness Tidal Energy In San Francisco Bay***". Will tidal power become a clean economical source of renewable energy for the Bay Area? The City of San Francisco is currently investigating the viability of building a 2 megawatt pilot tidal power facility in the bay, underwater. If successful, the proposed plant could become one of many in the bay each expandable to 100 megawatts. San Francisco Bay has been identified as one of the top 10 locations in the world most suitable for efficiently harnessing tidal power. Great care has been taken in the preliminary design to minimize environmental impact. Desalination and hydrogen fuel co-generation are energy application technologies that are being studied for inclusion in the project to increase commercial viability of the proposed tidal power facility. Peter O'Donnell is a San Francisco Environmental planner. Dr. Neil represents the Hydro Venturi Company, the designer of a tidal power facility operational in Grimsby England.

Sunday, June 8, 2003 1 p.m.

BYRON PHILHOUR, Ph.D., presents "***A New Era In Cosmology: Dark Matter, Dark Energy, Cosmic Inflation and the Microwave Background***". Intriguing results from the Wilkinson Microwave Anisotropy Probe (W-MAP) have caused quite a stir in the field of Cosmology. If you thought black holes were a bizarre concept, the W-MAP results have taken our understanding of the universe to a whole new even weirder level. Dr. Philhour will walk us through the dynamics of strange new theories about a universe forever accelerating its expansion into the unknown.

For more information about the San Francisco Tesla Society, call (415) 931-2593 or visit us online at www.sftesla.org where you can see free videos of past presentations..
