

The San Francisco Tesla Society

Winter -Spring 2010 - Schedule of Free Lecture Presentations at the
San Francisco Public Library - Richmond Branch
351 9th Avenue @ Clement, San Francisco, California
10th Avenue entrance. Call our Hotline (415) 820-1451 for more information

Sunday, February 14, 2010 1:45 p.m. - 4:00 p.m.

ROBERT J. ROWEN, M.D. presents "**Healing with Oxidation Energy**". Dr. Rowen, a Phi Beta Kappa graduate of Johns Hopkins University and graduate of the University of California, San Francisco School of Medicine is internationally known for his work in the field of complementary/alternative/integrative medicine. He is affectionately known as the "Father of Medical Freedom" for pioneering the nation's first statutory protection for alternative medicine in 1990 in Alaska, against a concerted opposition from the organized medical community. Jumping into alternative medicine in 1983 through a practice in acupuncture, he quickly expanded to nutritional medicine, chelation therapy, oxidation therapy, homeopathy and herbal medicine, and took intensive training in neural therapy and prolotherapy to help treat and eliminate acute and chronic pain. He is internationally known and respected for training hundreds of open-minded physicians from around the world. In 2001, he became editor in chief of [*Second Opinion Newsletter*](#). Rowen now lives in Northern California and provides part time consultation with his like-minded talented wife, **Terri Su, M.D.**

Sunday, March 14, 2010 1:45 p.m. - 4:00 p.m.

ERIC DOLLARD presents "**More on the Tesla/Alexanderson System of Wireless Transmission and It's Application at Bolinas, CA**". Eric Dollard elaborates on intriguing aspects of the Tesla/Alexanderson system and his years of experimentation at the Marconi/RCA Bolinas facility and elsewhere. Come learn more about systems like these where time can flow backward and energy transmission can be instantaneous.

Eric Dollard has spent much of his life studying the works of Nikola Tesla, C. P. Steinmetz, J.J. Thompson and others. Eric built his first 10 KW transmitter during high school and later excelled in the Navy as a microwave telecom trouble shooter. He is the author of several significant books on electrical theory. Eric Dollard currently provides consultation services to electric utilities.

Sunday, April 18, 2009 1:45 p.m. - 4:00 p.m.

We present "**Robert C. Beck D.Sc.: Suppressed Medical Discovery**". Dr. Beck presents his theories and his technologies in the fascinating video by the [*Granada Forum*](#). Beck was known for his leading-edge physics experimental designs in measuring subtle magnetic fields and extremely low frequency fields. His last research project in the early 1980's focused on the brain and altered states of consciousness resulting in the design of the Brain Tuner. This won him an award from the John Fitzer Foundation.

Beck read about a research project at Albert Einstein College of Medicine described in the March, 1991 [*Science News*](#). The article reported that "Zapping the AIDS virus with low-voltage electric current can nearly eliminate its ability to infect human white blood cells cultured in the laboratory . . ." Doctors William Lyman and Steven Kaali's research in this area piqued Beck's interest. In 1993, a patent was filed (US Patent #5,188,738) showing how micro-currents would neutralize pathogens by removing blood from the body in order to treat it with micro-currents of electricity. He later found this research was a rediscovery as many patents had been filed over the years showing the efficacy of electricity for health.

Beck developed a blood electrification method to pass the micro-currents into blood while it still flowed undisturbed in the body. He built several units to experiment on himself and friends and funded an AIDS study by two medical doctors. He also devised a simple method to produce ionic/colloidal silver in the home reviving interest in it as a natural antibiotic. He developed the Magnetic Pulse Generator to create micro-currents to kill dormant pathogens in lymph and tissue. Bob and his friends were getting healthier re-growing hair, losing weight, avoiding colds and the flu after blood electrification, ionic-colloidal silver and magnetic pulse generator experimentation. He started lecturing at Health Shows and died in 2002.

For more information about the San Francisco Tesla Society, call (415) 820-1451 or visit us on the Internet at www.sftesla.org where you can email us and see free videos of past presentations.
