

The San Francisco Tesla Society

Spring 2014 - Free Lecture Presentation at
20 Mission Center - 2415 Mission Street (near 20th Street), San Francisco, CA
Call our Hotline (415) 820-1451 for more information.

Sunday, March 9, 2013 1 p.m. - 5 p.m.

Barbara Honegger, M.S. presents "**9/11 Historic Context and Forensic Facts of the Pentagon Attack**". Barbara Honegger will present compelling evidence that internal controlled explosions executed by insider stealth "terrorists" occurred at the Pentagon on September 11, 2001. Detailed physical evidence shows that internal and external explosions began at or very close to 9:30 a.m. These facts conclusively refute the official narrative that Flight 77 crashed into the Pentagon causing the first explosions at almost 9:38 a.m. These explosions were also executed at locations far removed from the official narrative's alleged "plane penetration path". Were select Pentagon offices and documents targeted to be destroyed by the explosions?

Many of Barbara Honegger's 9/11 insights are prominently credited and featured online and in numerous publications. From 2000 to 2011, Ms. Honegger served as Senior Military Affairs Journalist at the Naval Postgraduate School in Monterey, CA. Ms. Honegger also served as a White House Policy Analyst and was a prominent whistleblower in the 1980's Reagan Administration. She is the author of *October Surprise*, the first book to document the secret deal between the 1980 Reagan-Bush Campaign and the radical Islamist Khomeini regime to delay the release of the U.S. hostages in Iran until after the 1981 presidential inauguration of Ronald Reagan. Ms. Honegger has a masters certification in National Security Decision Making from the Naval War College. Barbara also earned the first accredited U.S. graduate M.S. degree in Consciousness Studies/Experimental Parapsychology from John F. Kennedy University (1981). She holds a B.A. in Communications/Honors Writing from Stanford University (1969).

Sunday, April 13, 2014 1 p.m. - 5 p.m.

John Light presents "**Online Security For Inventors & Activists**". The internet is an incredible tool for communication, helping people collaborate and organize on a scale never before possible in human history. However, it is a relatively young and complex technology which was not designed with privacy of end-users in mind. As a result, many activities on the internet can be assumed to be public knowledge and easily attributable to a specific individual by default. For people working with sensitive information which requires more discretion and privacy, additional security measures must be taken to protect personal information. This talk will describe easy actionable steps that can add a layer of security to one's internet activities.

After starting a degree in International Business Management at Northern Virginia Community College, John took on marketing and operations duties at independent media startup *ADAM VS THE MAN* helping to build operations and expand the audience through social media. Since moving to the Bay Area in early 2013, John has been an active participant in the local cryptocurrency scene, starting a professional Bitcoin consultancy business at bitcoinconsultant.me, founding a local trading meetup called Buttonwood SF, co-founding PawnCoin, a company providing digital currency technology to the pawn industry, and blogging at *Let's Talk Bitcoin, Money and Tech*, and his own blogs at p2pconnects.us and [@lightcoin](https://twitter.com/lightcoin) on Twitter.

Sunday, June 8, 2014 1 p.m. - 5 p.m.

We present the film "**State of Mind: The Psychology of Control**". Are we controlled? To what extent and by whom? This film reveals that much of what we believe to be truth has been deception, deliberately implanted in our consciousness to erect a "tyranny over the minds of men". *State of Mind* examines the science that has evolved over generations to keep us firmly in place and maintain the status quo so that dictators, power brokers and corporate puppeteers may profit from our ignorance and conditioned slavery. From the anvil of compulsory schooling to media and entertainment, we are kept in perpetual bondage to ideas that shape our actions. Will we choose our own paths or have one selected for us? This film unveils answers that may decide whether humankind will fulfill its destiny or be forever shackled to its own creation.

Affordable parking is available a half block away at 2315 Mission St. between 19th & 20th St.
